

Wayne State University: A Leading National University

Wayne State University is a comprehensive urban research institution, fulfilling a unique niche in providing access to a world-class education at an affordable price. Our students learn from some of the best scholars in the world.

We are neighbors and have close partnerships with many of the world's Fortune 500 companies, offering students unparalleled learning and internship opportunities.

Our students have unrivaled connections to vast learning opportunities in Detroit and throughout Michigan. The nearly 200,000 alumni who live in southeastern Michigan offer unmatched access to mentors across virtually all career paths. Chances are the professionals you rely on every day - your doctor, lawyer, pharmacist, nurse, teacher or accountant - attended WSU.

Nationally Recognized Schools and Colleges

We offer more than 350 undergraduate and graduate degree programs through 14 individual schools and colleges. Convenient class course scheduling makes it easy for working students to enroll in the classes and at times they need for their major programs. Classes are offered on the main campus near Detroit's New Center area or at one of the five satellite campuses throughout Southeastern Michigan, including comprehensive centers in Farmington Hills and Clinton Township.

Leading-edge Research

Our faculty and students are engaged in practical research. Following are a few examples:

- * Blindness caused by degenerative eye diseases may become a thing of the past thanks to researchers, physicians and engineers using "smart sensor" technology to restore sight to patients.

- * New "Hot Sound" technology is a process with broad implications for airline safety, the automotive industry, and even the utility pipeline industry. The process, developed by scientists in the Institute for Manufacturing Research, combines infrared imaging with ultrasound to detect cracks and other defects invisible to the human eye.

- * The Department of Nutrition and Food Science has discovered two of the five known viruses that cause obesity in animals and has identified adenovirus-36 as a potential cause in some people.

Campus Growth and Activity

Wayne State's vibrant campus features more than 100 research and education buildings. And we're growing. Our \$650 million in recent and planned campus growth includes construction of a \$17-million Law School addition, \$15-million Welcome Center and a \$64-million College of Pharmacy and Health Sciences building.

The David Adamany Undergraduate Library is designed just for undergraduates. It contains more than 700 computer workstations and a 24-hour study center. Our new \$15-million Recreation and Fitness Center is free to all students and offers fitness classes, weight rooms, a climbing wall and basketball and racquetball courts in the heart of campus.

WSU is located within minutes of the Detroit Institute of Arts, the Detroit Historical Museum, Fox Theatre, the Museum of African American History, the Detroit Science Center, the Fisher Theatre, Orchestra Hall, Comerica Park and Ford Field.

Did You Know...

- * The first successful open-heart operation was performed at the School of Medicine in 1952? A mechanical pump was used to support circulation while a mitral valve was repaired.

- * We award nearly 400 four year, full-tuition scholarships based solely on academic achievement to incoming freshmen every year?

- * We influence automobile design and standards for sports helmets and equipment through our ongoing head injury research?

- * The first radial keratotomy procedure to correct myopia was performed at the School of Medicine in 1978?

- * President Abraham Lincoln's hat and Florence Nightingale's parasol are housed on campus?

- * The Foreign Language Technology Center in Manoogian Hall is a nationally recognized state-of-the-art language and culture teaching facility that brings the world to campus?

- * The Linguistics Program in the College of Liberal Arts is the home of the "Linguist List," a computerized service that assists linguists throughout the world? It recently received a major National Science Foundation grant to catalogue endangered languages.

- * More than 300,000 people converge on WSU's campus every September for the annual Detroit Festival of the Arts?

- * The Law School has held sessions of the Michigan Supreme Court and the Michigan Court of Appeals in the new Spencer M. Partrich Auditorium, allowing students to observe leading lawyers and judges in actual cases?

- * The MBA program is the sixth largest part-time program in the nation?

- * WSU hosts an annual International Fair celebrating the university's diversity?

- * The campus is supported by a state-of-the-art fiber-optic network, providing one of the fastest connections to the Internet of any college in the country?

- * Art is our largest undergraduate major with 523 students who have declared that major? Elementary education is second with 477 declared major students.

- * A new 360-room, on-campus residence hall opens for fall 2002?

- * Senior citizens receive a 75-percent discount on tuition?

Wayne State University Profile

Affiliation

NCAA Division I and II

Enrollment - 31,040

18,489 Undergraduates

12,551 Graduate/Professional

Campus

More than 100 buildings over 203 acres

14 School/Colleges

More than 350 academic programs

The Best of WSU

Top 2.5 percent among all universities nationally in the Carnegie Commission rankings.

Wayne State University is ranked among the top fifty public research universities by the National Academy of Science.

WSU has the 6th-largest part-time MBA program in the nation, according to rankings issued by Business Week magazine.

Forty percent of Michigan physicians received all or part of their education and training at WSU.

Athletic Academic Services

The Wayne State Athletic Department has developed a comprehensive approach to academic services for its student-athletes. With the re-organization of the department in the Fall of 2000, the newly-created role of Academic Coordinator for student-athletes has emphasized the need for graduation premised on: appropriate academic advising, major selection, tutorial assistance and class choices that best accommodate game scheduling demands.

The objective is to significantly increase the department's graduation rate over the next five years and to continually emphasize the success of WSU's student-athletes in the community. Part of the initiative already has been realized by the department's annual Spring Academic Recognition Banquet that not only honors student-athletes with a 3.5 or better grade point average, but also those individuals who will graduate that term. The name of each graduate will permanently be displayed on a brick as part of the department's "Wall of Fame." The recognition will be prominently displayed in the main concourse as visitors and students enter the Matthaei Athletic Facility Complex.

Services Available to Warrior Student-Athletes

Academic Monitoring

The Department of Athletics participates in the university-wide early alert system in which instructors in lower division classes provide notification to students and their advisors about unsatisfactory progress after the fourth week of classes. In conjunction with the coaching staff, requests for information about class attendance and performance are sent to each instructor. The coordinator tracks individual progress, schedules meetings with students as appropriate, and personally contacts instructors as necessary.

Counseling/Mentoring

The coordinator meets with student-athletes individually and arranges for group meetings/workshops with other support service personnel regarding academic, athletic, career, and/or personal issues (for example, group sessions covering such topics as test-taking skills, time management, learning styles, etc.) The Department of Athletics has collaborative relationships with many other critical units on campus to help provide appropriate support services.

Advising/Registration

In conjunction with academic advisors in the University

Over 120 student-athletes, faculty and staff enjoyed the first annual Student-Athlete Recognition Banquet held in April, 2001.

Advising Center, the coordinator assists student-athletes with term course planning and registration. The office also works closely with academic advisors in all the university's schools and colleges to ensure appropriate semester course selection and timely progress towards degree. The office serves as a clearinghouse for information about campus resources and student support services, university forms, enrollment deadlines and institutional academic policies and procedures.

Structured Study

In an effort to help ensure the academic success and the development of consistent study patterns of student-athletes, the coordinator organizes supervised study sessions for each team.

Tutorial Services, Writing Center, Mathematics Laboratory

The university provides free peer tutoring in most subject areas either on a drop-in or by-appointment basis. In the event that the Academic Success Center cannot provide tutoring for a specific class, the Department of Athletics has set aside funds to hire individual tutors. The coordinator works with academic department chairs to identify qualified tutors and is always available to arrange special individual or group sessions in a variety of areas. As in all other services, the office works in a proactive manner to provide assistance before academic problems arise.

Wayne State University President *Football*

Irvin D. Reid was sworn in as Wayne State University's ninth president in November, 1997. During his tenure, Wayne State has increased its reputation as a nationally ranked research university while expanding its array of direct educational services to metropolitan Detroit, the state of Michigan, the nation and the world.

President Reid holds master's and PhD degrees in business and applied economics from the Wharton School at the University of Pennsylvania, and bachelor's and master's degrees in general/experimental psychology from Howard University. Before coming to Wayne State, President Reid served as President of Montclair State University, the second-largest institution of higher education in New Jersey.

Under President Reid's lead-

ership, the university has begun enacting a Strategic Action Plan, which provides a blueprint for making WSU the nation's pre-eminent urban and public research institution in this century. The university also has adopted a Campus Master Plan, which sets broad guidelines for the development and expansion of our buildings, landscape and infrastructure over the next two decades.

During President Reid's term, a number of significant projects have been undertaken, notably a state of the art Recreation and Fitness Center; a new home for the Eugene Applebaum College of Pharmacy and Health Sciences; the university's first on-campus residence hall in 35 years; a Welcome Center and bookstore complex housing a full range of student services under one roof; and a new addition to the Law School. Work also has begun to renovate the first spaces in the Research and Technology Park, a 75-acre development north of main campus that will facilitate cooperation among the

university, businesses and government in direct benefit to the local and state economy.

Among President Reid's many honors are the Distinguished Postgraduate Achievement Award from Howard University; the Jewish National Fund's Tree of Life Award; the Austrian-American Medal, awarded by the Austrian-American Council of North America for exceptional service in promoting international understanding and global education; and a 2000 Michiganian of the Year award from *The Detroit News*. President Reid serves on the boards of many local, state, national and international business, educational and community service organizations.

Rob Fournier - Director of Athletics

Rob Fournier
Director of Athletics

Since his arrival in Aug. 2000, Rob Fournier has undertaken a strategic plan to invigorate the athletic program and shape a new course for its future. That plan already has realized some important accomplishments including: corporate support, student-athlete welfare and marketing outreach.

The corporate partnership program has generated the five largest company-sponsored gifts in the history of WSU athletics. Additionally, to secure individual and alumni support, a campaign to attract contributions has been implemented centered on the new quarterly magazine *Warrior Within*. The website (www.wsuathletics.com) which was launched in October 2000 provides daily updates for fans on the latest WSU sports information. Season ticket campaigns and targeted business response form the foundation of an effort to secure needed monetary support. Game promotions designed to attract a wider-base of community support and offer more entertainment options have been successful in building a community base of support.

With a focus on academic success

and graduation, Fournier has undertaken an effort to simultaneously increase the number of student-athletes who receive degrees by offering various support mechanisms including Wayne State's first academic advisor for student-athletes and an assortment of academic resources. Just as importantly, the first-ever Academic Recognition Banquet focused on classroom achievement and those seniors who were offered degrees. The Academic Wall-of-Fame is a daily visible reminder to student-athletes and community of the importance of scholastic success. The Wall has a plaque engraved for every WSU student-athlete who graduates.

Fournier has taken immediate steps to address facility shortcomings including the newly designed Hall of Fame foyer, Warrior "W" entrance, basketball office relocation and renovation and swimming pool improvements. These projects, and others planned for the coming year are the first steps in an on-going effort to build a new facility.

Prior to joining Wayne State, Fournier was the Senior Associate Commissioner and general counsel for the Mid-American Conference. While serving as the acting Commissioner of the Conference, he moved the league office from Toledo to Cleveland, wrote and secured a long-term contract for the men's basketball tournament at the Gund Arena and secured personally accomplished the three largest corporate gifts in the history of the MAC including First Energy as the tournament sponsor for men's basketball.

He also wrote and negotiated the Motor City Bowl football contract that is the MAC's yearly postseason Bowl invitation. As the chief compliance officer for the league, Fournier investigated and reported on over three hundred and fifty (350) infraction cases that insured fairness in case resolution and corrective action. At the request of institutions, he has appeared before the NCAA Committee on Infractions and

conducted campus revisions. He has served as liaison to various NCAA committees for which the conference held cabinet positions. The MAC presidents recognized Fournier's achievements when they unanimously conferred a mark of esteem for his efforts.

Previous to joining to the MAC, Fournier served as assistant athletic director at the University of Akron. In addition to overseeing the men's programs, he was responsible for all athletic financial aid, eligibility, drug/alcohol education and compliance. He formed one of the first student-athlete advisory groups (an effort he repeated at the Mid-American Conference) and was a member of the development executive board.

A former member of the faculty, Fournier remained active in the classroom at the University of Akron, teaching courses in communication and criminal justice.

A licensed attorney, Fournier received his bachelor's degree summa cum laude and his master's with honors from the University of Akron. He was a national forensics champion and qualified for the national finals in six events. Fournier received his law degree from the University of Akron in 1986 and was admitted to the Ohio bar that same year. Rob and his wife Pam reside in Detroit.

Kimberli Bowman begins her second year at Wayne State University as an Assistant Director of Athletics. Bowman joined the WSU staff after serving the previous two years as the Director of Athletic Compliance at Northern Arizona University in Flagstaff. Her responsibilities for the Warriors include implementing a comprehensive compliance program as well as serving as the sport coordinator for men's and women's hockey, men's and women's fencing, and men's golf.

A 1995 graduate of the University at Buffalo with a bachelor's degree in psychology, she worked as an administrative assistant with the Bulls Cross Country and Track and Field teams for two years following graduation, while earning hours toward a Master's degree.

During the 1996-97 school year, Bowman was a guidance counselor at Christian Central Academy in New York. An avid supporter of the fine arts, Bowman directed the CCA school musical, "The Music Man". She then returned to the University at Buffalo from 1997-2000 as the Recruiting and Eligibility Coordinator serving two of those years as a member of UB's Professional Staff Senate before joining the NAU athletic department.

Bowman is single and resides in Novi, Mich.

Jason Clark enters his third year at Wayne State as an Assistant Director of Athletics. Clark oversees the operations in the sports of football, softball and men's and women's swimming.

Clark was the director of the 2001 Great Lakes Intercollegiate Athletic Conference Softball Tournament held in St. Clair Shores, Mich.

Clark comes from the Mid-American Conference office where he was the Director of Administration. Clark's duties included coordination of all the conference's meetings and functions, and assisting the commissioner on special projects. He also was the staff liaison for field hockey, wrestling, gymnastics and softball. Previously he was the administrative assistant to the commissioner, handling awards and officiating as well as assisting with championship duties.

Clark began his professional career at the MAC as a graduate assistant.

He graduated from Bowling Green State University in 1997 with a bachelor's degree. Clark is single and resides in Troy, Mich.

Allison Tookes begins her third year at Wayne State University as the Assistant Director of Athletics and Senior Woman Administrator. Tookes is primarily responsible for overseeing the men's and women's basketball, men's and women's cross country, and men's and women's tennis and baseball programs in the department. Tookes is also the liaison for housing and transportation. She also serves on the Hall of Fame Committee.

This is Tookes' second stint with the Warriors. From 1979-1991 she coached the men's and women's tennis programs. She was the first woman to coach a male team in the state of Michigan. Tookes also coached tennis at Eastern Michigan from 1992-1996.

She received her bachelor's and master's degrees from Michigan State University. Tookes was inducted into the WSU Hall of Fame in 1993. She resides in Ann Arbor, Mich. with her husband, Eric, and son, Thomas.

Wayne State University Vice-President

Dr. Charles L. Brown is in his third year at Wayne State University as Vice President for Student Development & Campus Life. Brown oversees the departments of Admissions, Athletics, University Counseling, Career Planning and Placement, Office of Scholarships and Financial Aid, Recreation and Fitness Center, Housing, International Students and Scholars, Registrar, Student Center and Program Activities, and Student Systems Technical Support (SSTS).

Brown is a supporter of WSU student-athletes and is an avid Warrior sports fan.

“Having our outstanding athletic programs in addition to our excellent academic programs has made Wayne State an even better place for our current and prospective students,” Brown said. “Many alumni have told us, and continue to tell us, that they are really interested in WSU’s athletic programs.”

Brown’s road to Wayne State University spanned four different schools throughout the United States. Brown’s last stop before Detroit, in July, 2000 was at the University of Alabama as the Senior Associate Vice President for Student Affairs.

Brown also worked at the University of Delaware as the Director of the Academic Support Program,

Illinois State as the Director of Student Affairs and Academic Affairs and Illinois Central as the Director of Academic Affairs and Academic Administration.

Brown also served as an Assistant Professor of Education at the University of Delaware and an Associate Professor at the University of Alabama.

Brown holds an undergraduate degree from Blackburn College in Carlinville, Illinois. He received his Masters and Ph.D. degrees from Illinois State.

WSU FACULTY ATHLETIC REPRESENTATIVE

Mel Small begins his third year as WSU’s Faculty Athletic Representative, after assuming the position in September 2000. He is no stranger to the university as he has taught history at WSU for the past 35 years. A former

chair of the history department, Small has written or edited 11 books relating to contemporary American history, including *The Presidency of Richard Nixon* (1999).

In addition, Small was named president of the WSU Academy of Scholars (an association which recognizes scholastic accomplishments and international recognition).

On accepting his faculty representative position, Small commented “I am excited about working with the WSU Athletic Department because I believe strongly in both the need to link intimately academics with collegiate sports and, especially, the need to promote the visibility of the WSU athletic program on campus and in the community and beyond.”

Small and his wife, Sarajane Miller-Small, have two children (Mark and Mike) and four grandchildren, which includes a set of triplets. A resident of Royal Oak, he received his undergraduate degree at Dartmouth College and his MA and Ph.D. degrees from the University of Michigan.
